### MARRIED.

HOPKINS-AIWOHI-In Ainakea, North Kohala, Hawaii August 5th, by Rev. E Bond Mr CHARLES L. HOPKINS to [The Printers, who were the recipients of a liberal share of the wedding-cake. (coming as it did "o'er the deep bine sea ") most heartily take this method of thanking their brother-typo and his bride, and wish them a long and happy life ]

## BIRTH.

In Nuusuu Valley, August 10th, to the wife of Capt. San-croft Gherardi, U. S. N., a son.

## Relief of the French Sufferers.

HONOLULU, August 7th, 1875. members of all nationalities without one exception came forward with their liberal offerings. The amount which I at that time forwarded to my counhesitating to impose snew upon the generosity of the inhabitants of the Hawaiian Islands, though well aware am I of the terrible disasters actually striking the south of France.

However, some kind members of the community have spontaneously sent me their subscriptions, so that I feel constrained to appeal publicly to general islands, being induced to do so, by the bonus benevolence. To this effect lists of subscriptions in which our Government is enabled to offer for imfavor of the sufferers from the floods in the couth of Prance, will be open in the following places: Store o. B. M Whitney, Publisher Hawsiian Gazette ; J. H. Black, Publisher COMMERCIAL ADVERTISER; Store of T G. Thrum, Publisher Islander; Office Bishop & Co., Bankers; Allen Herbert, Proprietor of Hawaiian Hotel. Besides monetary subscriptions, I shall be glad to receive any Hawaiian products which donators might be willing to deposit with Mesers. Schaefer & Co. These articles would be sold by auction in September next, from 5th to 10th, under Mr. Pernet's care, as well as any needle work that ladies might desire to remit to Mrs. Ballieu. Trusting in your benevolent asistance and the wellknown liberality of this community, I am, Mr. Edi-

tor, Your obd't servant.

TH. BALLIEU.

#### THE PACIFIC Commercial Advertiser.

THE GOVERNMENT is evidently determined to utilize the appropriation for immigration voted by the last legislature. They offer a bonus of twenty-five dollars a head for bringing free immigrants from China; and this inducement is fifth as many women as men. But we hope the Government will endeavor to secure quite as value of Chinese labor; but that Chinamen, The credit sale by C. S. Bartow at Mesers. Schaofer & Cols | Who wont buy land and establish homesteads, are man will scrape a leased land bare before he quits it; but a Portuguese, and we believe a Hindoo or a Japanese, and perhaps a Molaccan or Indian Islander would plant trees and make a home in the islands. If only the women will come, the children will be sure to come, and then we certainly will have more material for making

> instances, it must be uniform and unvaried in We have at other times rejoiced in the treasall the running of the vessel. We must not ures of the mountains and the valleys, that have a pretentious show of punctuality at certain glisten with glory in the face of the sun; but times, and gross delays to satisfy some favoritism | there is as deep a joy and interest for the thoughtin other cases. The steamer belongs to the pub- ful and worshipful soul in the arcana of the Adams, Mr

fantie. May ish lat 210 8 long 370 W signalized ship Don dustrious thrifty peasantry are be found; and cause we can circumnavigate it in as many the thousands of destitute people, whose homes simal myriads of atoms, select one for your espeand vines, and all have been swept away; and cial study, a globigerina, that requires a good so we may be entitled to a comforting help when a tidal waves shall swamp our shores. However, let us do a little for good will's sake. A little produce, as well as money will be thankfully received by the Commissioner of France; and Madame Ballieu will gladly receive articles of needle work, mounted ferns, &c., all of which will be sold at auction by Mr. Pernet, the chan-

> A committee of gentlemen, Messes, W. F. Allen, 8. C. Glade and John H. #### THE DEPTHS OF THE SEA

AN OBSERVED ON BOARD IL B. M. SCIENTIFIC DIS-COVERY SHIP CHALLENGER.

SATURDAY, AUGUST 14 are among the most beneficent enterprises devised by governments. It is work done for the whole world; and what a great gift does an enlightened state confer upon other nations, when she sends her strength and skill abroad to be employed in collecting and classifying hidden and important things of the earth; and then discloses all, without any especial reservations for herself. This England is doing now-and she is accumulating obligations upon enlightened nations by the great voyage for scientific discovery in which the Challenger is now engaged-of which we took some observation on board.

opinion, but is a determined searcher after truth. PUNCTUALITY, in respect to public conveyance. He admits the possibilities of variation through is vitally important to the business and general countless ages, and to some extent is an evoluinterests of a country. A public carrier should tionist; yet he says :- "so far as practical nadepart at the instant of time, Indicated by his turalists are concerned, species are permanent schedule, and should not go a minute before nor within their narrow limits of variation, and it delay a minute after for any personage, -even | would introduce an element of infinite confusion | the very highest in the land. We strongly and error, if we were to regard them in any other endorse the observance of punctuality is our in- light." Thus equiped, with the spirit of faithterisland steam communication; and would com- ful research, and with all the appliances that mend the officers of the Kilauca, if we should be modern skill can devise, he has been finding out land a better title than heretofore held by her of left behind, when one minute too late. But for paths, and picking up marvels in the great deep the Mistress of the Seas. this punctuality to be respected in particular that have excited our highest interest and wonder.

lic, to every tax-payer in the country; and a sunless depths of the sea. 'Tis infinitude everyhigh-minded management of this great public | where; whether in the greatness of the Heavenly convenience should not swerve from a schedule | bodies, or in the microscopic minuteness of cunonce announced, -not for any high official, at ning and baffling nature, that still hides from the the risk of disappointing hundreds of people gaze of man, as many wonders in atomic minute- Biglow, H D Brueuing, E W on the other islands; nor for any noble, or ness, as in titanic immensity. And we were gladsupposed wealthy traveler, any more than he dened with a vision of things, that come from depths would for a poor native hastening with his bundle | that would submerge the top of Himalaya,-from half a minute too late; or for a sick lady, anx- a bed of soil and shell, that is covered with ious to get home, who had all her effects on 4475 fathoms, or a little over five miles of supboard, but who had not kept exact instantaneous erincumbent sea. Here live and move the minute foraminiferæ. They are but pin points Francis, J Foster, Fredrick to the naked eye, and yet with the help of the FRENCH SUFFERERS by flood again call for the magnifying lenses in the Natural History room Glesson, active exercise of our sympathy and good will. we could observe the gangliated nervous systems Graves. But look with us into the ocean abyes. Lancashire operatives and Irish peasantry were and swoop down with ardent, buoyant soul, and starving, and when a hundred thousand or more | search with the eager, hungering eyes of love of Americans were houseless at Chicago. We throughout the shrouded depths, upon the plain who live in security and comfort upon our of ooze that is more than ten thousand feet volcanie peaks in the sea, can send a trifle to beyond the sun's rays, and there amid infinitenatural eye sight in order to discern the atomic speck it presents in visible creation. And now, with your lens you expand its dimensions many thousand times, and you behold a well defined spheroidal shaped body, that is covered with more than a thousand distinctly defined bosses; and as each boss or protruberance presents a marked with as many points, spots, or interstices, as the main body of the atomic creature; and power, the millionth part of a creature, whose paneture made by a common pin in a piece of may soon lack all opportunity for the occupation of the spirit of discovery. One square foot of this marvellous earth made by our Almighty ered, among many other schemes, for re-peopling | Father may be enough to occupy with interesting

But we must not dwell upon atomic marvels, their descendants upon the Azores, or western with which our microscopic society will be occuislands of the Atlantic, and upon the Cape de | pied, by and by. We will take a glance at the equipment of the ship for the purpose of reand means of the mother country, the people of search, study and illustration. Her foremost these once prosperous islands have lost many apparatus for scientific work is her dredge for deep sea collections. This seems to be a wrought WE HAVE RECEIVED so that now, Portuguese islanders in the Atlantic | iron frame about four feet long and a foot wide. are ready to leave their place of birth and to To this is laced a strong bag net, about four or carry their industry to remunerative lands that | five feet square, along the extreme edge of which are several rope swabs for trawling along the home. Some of these western islanders who bottom. A strong rope of Italian hemp is secured to this frame which passes over a sheave small cultivators and graziers. Such people be- | connected with an apparatus named the accumucome a settled yeomanry that would be the main lator. This accumulator consists of two circular stay of the country. The merchant and planter | discs of wood connected together by a number of are ever ready on any little show of prosperity India subber rods, which give and take, whilst the dredge is drawn over the inequalities of the bottom of the ocean. And in this deep sea scoop have been brought up marvellous zoophytic creatures, crustacea, prawns, and small fish from depths varying from 500 to 2,000 fathoms.

For all this work, miles of rope and line are stowed away on board, and also tons of iron to be thrown away with the frequent casts of the deep sea sounding line. For obtaining samples of water from different depths of the sea there are bottles of brass, most simply and ingeniously arranged for filling and closing at any depth; and their thick sides of one-quarter of an inch of metal, show what strength is necessary to provide against the extraordinary pressure of the sea, which is about one ton to the square inch for every thousand fathoms. We saw one cylinder of thick sheet brass, which had been flattened in BUCKWHEAT, GRAHAM AND EXTRA Just received ex Mary Bell Roberts the deep water, as though it had been battered together with a sledge hammer.

The supply of appliances and material for With judiciously prepared solutions of picric, chromic and osmic acids, they succeed in preserving the exact forms of molluscous and gelatinous creatures better than in alcohol-and so the scientists of this expedition have succeeded in preserving the soft bodied creatures of the sea, selves and improve the country. And then we with all their natural shape and color. They have a vast accumulation of specimens, and have sent large shipments home, and scientists of the world will be busy for many years to come in OATS AND BRAN. drawing upon the treasures of natural history

gathered up by the Challenger. But this ship has not been engaged in merely collecting for museum exhibition and for study. Her practical object and duty is that of a pathfinder in the depths of the sea. In respect to this great work, she must render immense service

telegraphy may be affected by temperature. She has thrown light upon the nature of creatures which may prey upon the materials that enter Voyages of scientific quest and observation, into the composition of telegraphic submarine

to the world. She has tested how far deep sea

cables. She has mapped the indentations of the ocean depths around the world; and so she will make electric communication by sea, and especially for us in the Pacific, a clear and calculable enterprise, so that nothing bot a question of time and money shall keep us from instantaneous communication with the American coast.

Thus Prof. Thomson and his brother scientists, associated with him, Mr. J. Y. Buchanan, Mr. H. Mosely, Mr. John Murray, Dr. Von Sohm, and the artists Mr. Wild and Mr. Ley are engaged in a great and beneficent mission, such as occupied the American ship Portsmouth This expedition has been placed in very effi- in this ocean. But we are sorry to observe the cient hands. The author of the "Depths of the difference of appreciation of this great work as Sea," Prof. Wyville Thomson, was the right shown by the Navy Department at Washington, man to search still deeper and wider. We have and the British Lords of Admiralty. The former followed him in his cruisings on board the removed a scientific discovery ship from her Lightning and the Porcupius in the German valuable work in these seas, and at an expense ocean, and among the Farce islands, and fully equal to the cost of her pursuit of knowlhave seen how close and thorough he is in his edge, sent her home to Mare Island, and there work. He is not influenced by any theoretic fonded her with a lot of useless guns, whilst the latter, listening to the voices of her men of science, her Carpenters, and Franklands, and others of her Royal Society strengthens the hands of the path finding Professor, gives up a great frigate to the pursuit of knowledge, throws aside the costly guns, sends forth a gallant and experienced naval officer, Capt. Thomson, to sail a ship subservient to science and research, and thus striving by indefatigable work and sacrifice on the deep, to establish for Eng-
